Device Id	Refresh Time	Recent Location	Recent Time	View Speed	Vehicle Status
<input type="checkbox"/>	05 seconds or <input type="text"/> in seconds	C G Rd, Ahmedabad, Gujarat, India	Monday, February 09, 2009 12:26:01 PM	<input type="text" value="Default"/>	Moving [37.4 Km/Hr]

## BONRIX TRACK & TRACE GPS SYSTEM (BTTGS)

A GPS tracking unit is a device that uses the Global Positioning System to determine the precise location of a vehicle, person, or other asset to which it is attached and to record the position of the asset at regular intervals. The recorded location data can be stored within the tracking unit, or it may be transmitted to a central location data base, or internet-connected computer, using a Cellular (GPRS), Radio, or Satellite modem embedded in the unit. This allows the asset's location to be displayed against a map backdrop either in real-time or when analyzing the track later, using customized software.

The Bonrix Track & Trace GPS System - a Unique and Innovative Location Based Services (LBS) is developed as web application software that provide clear view of persons or vehicles that are using by any organization or company for their work. BTTGS has been developed as web-base and mobile phone software package that provide flexible view of their persons or vehicles on the map.

Device Id	Refresh Time	Recent Location	Recent Time	View Speed	Vehicle Status
<input type="checkbox"/>	05 seconds or <input type="text"/> in seconds	S V Desai Marg, University Area, Ahmedabad, Gujarat, India	Monday, February 09, 2009 12:30:07 PM	<input type="text" value="2"/>	Moving [39.0 Km/Hr]
